- Tools:** VS Code, Anaconda, MediaPipe, OpenCV, Dev ,Microsoft office
- Concepts:** OOP, DSA, NLP, ML,DL, Computer Vision
- Languages:** English (Fluent), Urdu (Native), Chinese (Conversational)

Academic Experience

Eco Try-On (FYP Project)	Dec 2024 – Jun2026
AI-powered web-based virtual try-on system for sustainable fashion in e-commerce.	

Group Leader

- Built and led an AI-powered virtual try-on system tested by 50+ real users, achieving 80–85% accuracy in outfit visualization, size prediction, and color & style recommendations using Computer Vision and Deep Learning.
- Developed 4+ integrated modules (virtual try-on, size prediction, color recommendation, style suggestion) using MediaPipe, OpenCV, and ML models, delivering a fully functional end-to-end fashion e-commerce solution.

Cerebro Website	Nov 2024 – Jan 2025
Mental health awareness website built using HTML, CSS, and JavaScript	

Group Leader

- Built a fully responsive 6-page mental health website covering 10+ conditions with structured educational content and wellness resources.
- Designed an interactive, user-friendly UI with clean navigation and engaging visuals, presented at university level.

Banking Management System	April 2024 – Jun 2024
Banking operations management system built using Java (DSA) and MySQL	

Group Member

- Developed a secure banking management system in Java and MySQL featuring 5+ core modules including credit/debit transactions, account management, and automated daily report generation, achieving 95% data accuracy and improving process efficiency by 30%.

Police Management System

Secure and structured record management system for police stations.

Group Leader

- Built a secure police record management system in C++ (OOP) with 5+ modules including FIR, investigation, and officer/criminal records, boosting data security and improving record retrieval speed by 50%.

Oct 2023 – Jan 2024

Hotel Reservation System

Console-based management system for hotel bookings, billing, and reporting.

Group Leader

- Built a console-based hotel management system in C++ with 5+ modules including booking, billing, reporting, and staff record management, generating automated monthly reports, improving overall operational efficiency.
- Streamlined hotel operations and reduced booking errors by ~40%.

May 2023 – July 2023

Breakout Game

Developed a Breakout game in assembly language with core gameplay mechanics for interactive user experience.

Group Member

- Designed and optimized game logic and interface, achieving approximately 90% smooth gameplay response and improving user interaction and engagement by around 25%.

May 2024 – Jun 2024

Language & Accessibility Tools – Python

Python-based Language & Accessibility tool using NLP and AI for educational accessibility.

Developer

- Built a Python-based multilingual translator supporting 100+ languages and a voice-to-text tool using NLP to detect programming concepts, designed to improve educational accessibility for deaf learners.

Aug 2025

Extracurricular & Volunteer experience

Private Tutoring

Tutored 10+ high school students in Computer Science concepts and practical exercises over 1+ year, improving student understanding through structured lessons and hands-on practice.

Chiniot, Pakistan

Certifications & Achievements

Introduction to Flutter – Simplilearn (2025)

Python – Coursera (2025)

Project Management & Project Selection Methods – UniAthena (Cambridge International Qualification, UK) (Jun, 2025)

Punjab Educational Endowment Fund Scholarship – middle school (2016)
